Functions of various elements:

This audio player uses the same control options as Windows Media Player. If you are familiar with Windows Media Player, you can skip this manual.

Playlist : Displays your selected music.

Visualization Window : Shows a visualization while the playback of your selected song.

Seek Bar : Shows the progress of your song. Can be used to skip parts of song.

Browse Button : Click this button to add files to your playlist.

Play/Pause Button : Click this button to play the selected song in your playlist.

Stop Button : Stops the playing song.

Next Button : Plays the next song in the playlist.

Previous Button : Plays the previous song in the playlist.

Volume Control : Controls the volume of the playback.

Balance Control : Controls the balance of the speakers.

Adding songs in the playlist :

To add songs in your playlist,

1. Click on the Browse button.

2. Select single or multiple files in your computer which you want to add.

3. Click on "Open".

Your selected files will appear in the playlist !

Playing a song :

If your song is in the playlist,

Double - click on the song you want to play.

Or,

If no song is currently playing,

Click on the song you want to play and hit "Play".

If your song is not in the playlist,

Add your song in the playlist. (Refer the above section)

Then,

Play your song. (Refer the above part in this section)

Pausing a song :

While a song is playing,

Hit the "Pause" button to pause it. Again clicking the pause button starts the song from the point where it was paused.

Stopping a song :

Just hit the "Stop" Button.

Playing the next song :

Just hit the "Next" Button.

Playing the previous song :

Just hit the "Previous" Button.

Using the Seek Bar :

The seek bar can be used to skip parts of songs.

It starts playing the song from the point where you place the pointer of the seek bar.

Just drag and drop the pointer of the seek bar to the desired location.
